PROFESSIONAL SUMMARY

Aspiring Software Developer with a strong foundation in Core Java, Spring Boot, and Oracle SQL. Experienced in building RESTful APIs, designing web applications with Spring MVC, and implementing Spring Boot Security. Hands-on with Maven for dependency management and MySQL for database design. Currently building a full-stack production platform used to manage feature roadmaps and user feedback. Quick to learn new technologies and collaborate across teams to ship reliable, well-tested solutions.

PROFESSIONAL EXPERIENCE

Full Stack Developer — Portfolix Tech *Mar 2026 – Sep 2026*

- Work as a Full Stack Developer at Portfolix Tech, developing and maintaining responsive, production-ready web applications from frontend interfaces to backend services and database integration.
- Build frontend features using Next.js, React.js, TypeScript, JavaScript, HTML, CSS, and Tailwind CSS, including reusable components, responsive layouts, forms, state handling, and REST API integration.
- Develop backend services using Next.js API routes, Node.js, TypeScript, Prisma ORM, and MySQL for CRUD operations, data validation, roadmap publishing, suggestion submission, voting, image uploads, and persistent data management.
- Create admin dashboards, test and debug APIs with Postman, manage source code through Git and GitHub, and mentor junior contributors on React structure, API design, and team workflow.

Java Development Intern — Inmakes Infotech Pvt. Ltd. *Oct 2025 – Mar 2026*

- Developed backend applications using Core Java, JDBC, Hibernate ORM, and Spring Boot.
- Built responsive frontend features using HTML, CSS, JavaScript, and React to support end-to-end web applications.
- Collaborated with senior developers to debug and optimize application performance during code reviews.
